

Caslon Primary School Allotment – the water tubs are running out of water, so I connected up to the nursery outside tap

2 good lengths of hose pipe, later 3 bins are filled up

Inside the tunnel, parsnips, blanch leeks, pepper, red onion sets, celery, pumpkin, beetroot and tomatoes

Took from tuther end, a good grape vine as well

Everything in the tunnel is top dressed with worm casts from the school wormery

The blackberries are still putting on weight!

The blackcurrant wine ready to demi john!

Sieve out lumps

Labeled, rack off (the wine) in 3 month to clear

Outside grape on the plot doing excellently, it has had the best weather

Badger fur...could it be from ring sting or a chilli fur ball!

Gladi's early, with nature you usually get ups and downs – I'm used to it now

Had this chap from BBC Gardener's World Live - his first bloom
