

Pomona fruits, cordon cherry sweetheart and cordon damson merryweather delivered

They were put in a bucket of water for a couple of hours before planting out

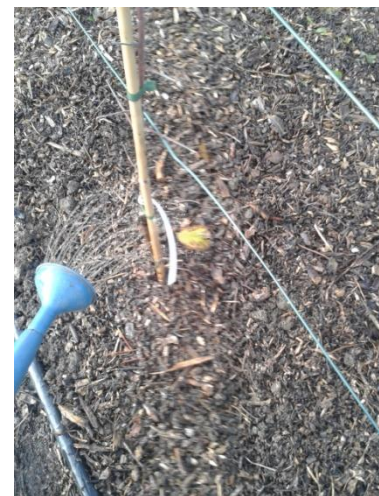

Hole, hoss muck and a fist full of tree growth enhancer from carbon gold

The soil is put back in hole, firmed well and wood chip put back over

They are then given a good watering

Both trees were planted, and the blackberries are to come out next weekend...Anna best find a space!!

Mycorrhizae for trees, shrubs and roses

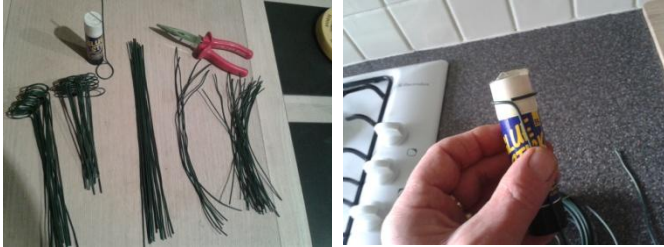

Colin gave me a hand this afternoon to put on my tunnel sides (timber), plus the ridge piece on top! I owe him a pint cos he froze his nuts off!

Did a podcast with Dave on Tuesday, so spent 3/4 of an hour on the phone! It should be ready mid-January

Wire from wilko or B&Q, cut into 9" and 12" lengths and then straightened. I use a pritt stick to get my rings! These are used for my onion and leek seedlings

I did a bit more work done today on my tunnel, framework one end of the tunnel – I aint much cop at DIY
