

Having a go at the heavyweight leek class at Malvern (11" round)

One of my Blanch leeks went to seed, so we 'et him!

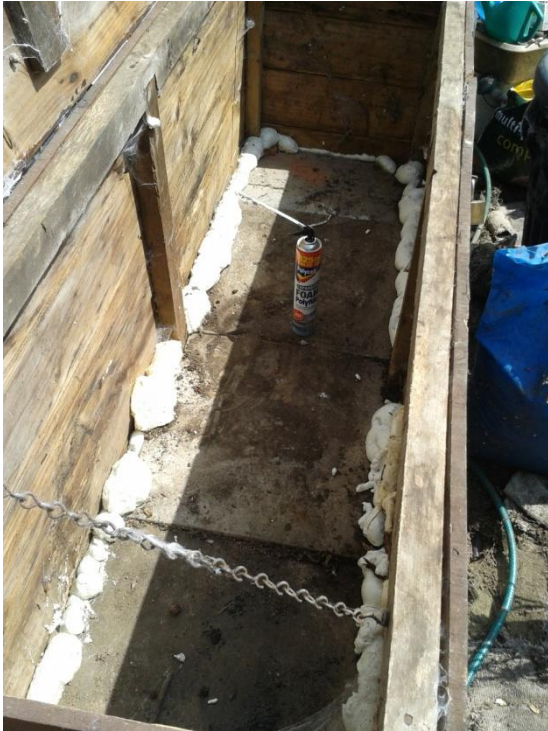

We had our bring & buy last month, and at the end of the auction there were some straggly cabbage plants that no one wanted. I threw in 50p for them and this is the result...good brew underneath!!

Cue doing well...2 of these will do me for our show

My chilli "Aji fantasy" starting to turn yellow

Have a tool box on my plot, wood was going a bit rotten in places with mice getting in, a large tube of expanding foam from wilko fills all the gaps...job done!

My 3 palletted compost/leaf mold/manure bays have now gone!

Badgers have been a pain in the aris looking for worms, so I have fenced in my gladioli beds. Have been round the perimeter of the fence and slabbed the holes!!

Because of getting new plot holders on the wheel chair plot I haven't thinned out the grape vine – it's never looked so good - loaded!!

Had 2 talks this week taking along raffle prizes to help 'em out!

Found these out during the week. When I was in the mob, on a weekend I used to smuggle the pipe tobacco out for the old man - best he had ever smoked
